WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make 2. The right plate is the left plate turned over: cut both from one file.

Outline about 681 x 585 mm; front edge vertical, 210 mm deep at the head tube.

Holes: bottom bracket 35.5 mm; four 9 mm stay bolt holes; 9 mm bolt holes for the ribs, saddles and upper yoke.

Two lightening windows (rear and in the bottom bracket lobe).

Top edge: 14 tabs into the top cover, 5 T-slots between.

Bottom edges: 7 tabs into the bottom cover and lower yoke, 3 T-slots.

Inside face: slots for the two ribs, two seat tube saddles, upper yoke.

T-slot: 9 mm wide, 23 deep, with a 13.6 x 8.4 mm window 10 mm in for the nut.

Deburr every edge, slot and window. Keep the tabs square.

Fit: the plates stand 60 mm apart (inside faces), joined by the ribs, saddles and yokes; the covers close the box top and bottom.

Check: a scrap of 3 mm plate slides into every slot by hand.
