WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Strip 676 x 90 mm. It lies on the side plates' top edges and overhangs each plate by 12 mm.

Two rows of slots 33 mm each side of the centre line: the side plates' tabs come up through them. In the front 280 mm (the closed box) the slots are 22 mm apart: they carry the twisting load.

Bolt holes 9 mm between slots (28 slots, 10 bolt holes 9 mm).

Oval hole for the seat tube, 34 x 45 mm, about 100 mm from the rear end.

Fit: drop it onto the tabs, then M8 x 25 bolts down into the side plates'

T-slots with a locknut in each window.

Check: every tab shows through its slot and sits flush or just proud.
