WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Strip 220 x 90 mm under the sloping bottom edges of the side plates, between the bottom bracket lobe and the lower yoke.

Two rows of slots 33 mm each side of the centre line; 12 slots, 4 bolt holes 9 mm.

Fit: hold it up onto the tabs; M8 x 25 bolts up into the side plates'

T-slots, locknuts in the windows.

With the top cover it closes the spine into a box (torsion: FTK-CAL-001).

Check: no gap between the cover and the plate edges.
