WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make 2, identical. Plate 92 x 60 mm with a 32.8 mm hole in the middle for the 31.8 mm seat tube.

Each 92 mm edge: a tab in the middle and a T-slot 30 mm either side.

T-slot: 9 mm wide, 23 deep, with a 13.6 x 8.4 mm window 10 mm in for the nut.

Fit: the saddles sit across the spine at right angles to the 73 degree seat line, 100 mm apart along it; the seat tube passes through both and a shaft collar bears on the outside face of each.

Check: the seat tube slides through both saddles without binding.

FLATTRIKE
