WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Flat plate 150 mm long, 60 mm wide at the back (it fits between the side plates), 400 mm wide at the front where it meets the bulkhead.

Hole 34.5 mm, 90 mm from the back edge: the headset cup spigot.

Back edges: one tab and one T-slot each side. Front edge: 4 tabs and 3 T-slots into the bulkhead.

T-slot: 9 mm wide, 23 deep, with a 13.6 x 8.4 mm window 10 mm in for the nut.

Fit: it lies flat on top of the head tube; the upper headset cup's flange holds it down on the tube end.

Check: the hole is 90.0 mm from the back edge, give or take 0.5 mm.
