WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Flat plate 160 mm long, 90 mm wide at the back, 474 mm wide at the front where it meets the bulkhead and the two rails.

Hole 34.5 mm, 100 mm from the back edge: the lower headset cup spigot.

Back part: a slot (a side plate's tab) and a 9 mm bolt hole each side, 33 mm from the centre line. Front edge: 4 tabs and 3 T-slots into the bulkhead.

T-slot: 9 mm wide, 23 deep, with a 13.6 x 8.4 mm window 10 mm in for the nut.

Fit: it lies flat under the side plates' level bottom edges and under the head tube; the lower cup's flange holds it up against the tube.

Check: the hole lines up with the upper yoke's hole (plumb line).
