WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Sketch: one washer (left) and one tube (right).

Washers: 16 mm outside, 8.5 mm hole, 3 mm thick; cut 78 from the sheet's offcuts in the same laser run.

Stacks of 9 go between the spine and each stay at the four stay bolts (27 mm); stacks of 3 go between the bulkhead and the box (9 mm).

Tubes: saw 16 x 2 mm steel tube into four 60.0 mm lengths, square the ends with a file. One goes inside the spine at each stay bolt so the bolt cannot squeeze the side plates together.

Check: each tube is 60.0 mm long, give or take 0.2 mm.
