WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make 4, identical. Plate 76 x 142 mm with a 34.5 mm hole 82 mm from one end, centred across the width: the headset cup spigot.

Two rows of slots 53 mm apart (the post plates' tabs), two 9 mm holes in each row.

Fit: one under the knuckle head tube and one on top; each cup's flange holds its plate against the tube end. The flange bears 2.5 mm inside the post plates, so the wheel load goes straight into them.

Check: the hole is square to the plate and burr free.

FLATTRIKE
