WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Plate 183 mm long, 40 mm wide at the column end, 26 mm at the tip.

Two 9 mm holes 64 mm apart on its centre line: the crown bolts.

Tip: 8.2 mm hole for the drag link's rod end, 120 mm from the steering axis.

Fit: bolted flat under the steering fork's crown, pointing back and to the right, parallel to the left steering arm; the drag link, drop arm and left arm then form a parallelogram, so the left wheel turns as far as the handlebar.

Check: drop arm and left steering arm hole centres are 120 mm out.
